INTERNATIONAL REINDEER HUSBANDRY CONFERENCE 2022

*The pathway to sustainable reindeer husbandry –
Two ways of knowing*

The conference sums up the RIEVDAN project about traditional knowledge of reindeer husbandry in a changing world. The conference is open to all, but a key target audience are reindeer herders. The aim is to engage the participants through an interactive and varied program. The conference provides a series of short scientific presentations followed by feedback from and discussions with the audience, as well as traditional food and cultural events.
